Technical characteristics

Through the Taru settee, the designer's intention is to create a comfortable place to sit which shows off the craftsmanship and expertise of Ligne Roset. Taru is comfortable and welcoming, with its fully upholstered base giving it real character. The seat is also intertwined with its subtly curved backrest in a bi-material treatment. It is available as a large settee, medium settee and 1-arm settee (left or right). This model's originality springs from the vast potential for mixing materials (fabrics and leathers) and colours thanks to the superb rear section of the back, which may be customized as desired. This is a settee with two faces which is thus worth showing off as much for its front view as for its upholstered rear view. It may be complemented with an optional back cushion to further accentuate the model's comfort, and/or a footstool with an identical base to that of the settee. CONSTRUCTION Structure of
