

# COMPOSITION TOGO

## Designer

Michel Ducaroy

## Dimensions

## Technical characteristics

### CONSTRUCTION

Entirely composed of 3 different densities of foam (polyether foam 21 kg/m<sup>3</sup> - 3.2 kPa & 28 kg/m<sup>3</sup> - 4.8 kPa; high resilience polyurethane foam 26 kg/m<sup>3</sup> - 1.4 kPa).

### MAKING-UP

Its oversized covers are generously quilted with polyester. Although the covers can theoretically be removed by a professional, we strongly recommend that this model be the object of a 'dec/rec' (recovery) service at our factory to guarantee a perfect fit.

### COMFORT

Elasticity of foams reinforced by buttoned threads. Soft but supportive comfort. The corner seat is particularly enveloping.

### COVERING MATERIALS

Plain or printed fabrics are acceptable. Canvas and leather are recommended.

## QUALITY

Polyether foams of the highest quality. Generous use of polyester quilting.
