

# COMPOSITION D11 DITA SYSTEM

## Designer

Pagnon & Pelhaître

## Technical characteristics

If it might be reminiscent of certain metal modular office systems, Dita draws a clear distinction with its lacquered panels which are made of wood rather than sheet metal and by its discreet streamlined uprights with their sophisticated finish. Each module is equipped with a handle matched to the uprights of the structure. The uprights are in 15 x 15 mm aluminium profiles in an anodised brushed bronze finish. These encase the wooden panels, the interiors of which are finished in argile lacquer, with a choice of 15 colours for the visible external faces : - standard : blanc satiné, argile, perle; - to order : beige, chocolat, noir, brique, make-up, moutarde, vert sauge, plomb, bleu nuit, brun acajou, cuivre, gris platine. Dita System may be used as a room divider, in which case a double-sided back panel should be added

## Dimensions

Height 1,900 mm | Width 1,074 mm | Depth 450 mm

behind the chests. Back panels of niches are always lacquered on both sides. Handles are in injected zamak, bronze lacquered to match the uprights. The feet H 30 mm further extend the uprights and have black jacks.
