

COMPOSITION DOUBLE- SIDED E13 DITA SYSTEM

Designer

Pagnon & Pelhaître

Technical characteristics

If it might be reminiscent of certain metal modular office systems, Dita draws a clear distinction with its lacquered panels which are made of wood rather than sheet metal and by its discreet streamlined uprights with their sophisticated finish. Each module is equipped with a handle matched to the uprights of the structure. The uprights are in 1/2" x 1/2" (15 x 15 mm) aluminum profiles in an anodised brushed bronze finish. These encase the wooden panels, the interiors of which are finished in argile lacquer, with a choice of 15 colors for the visible external faces : - standard : white satin, argile and perle - to order : beige, brick, chocolate, make-up, moutarde, sage, black, lead, bleu nuit, mahogany brown, copper, platinum grey Dita System
