

COMPOSITION DOUBLE- SIDED E21 DITA SYSTEM

Designer

Pagnon & Pelhaître

Technical characteristics

If it might be reminiscent of certain metal modular office systems, Dita draws a clear distinction with its lacquered panels which are made of wood rather than sheet metal and by its discreet streamlined uprights with their sophisticated finish. Each module is equipped with a handle matched to the uprights of the structure. The uprights are in 15 x 15 mm aluminium profiles in an anodised brushed bronze finish. These encase the wooden panels, the interiors of which are finished in argile lacquer, with a choice of 15 colours for the visible external faces : - standard : blanc satiné, argile, perle; - to order : beige, chocolat, noir, brique, make-up, moutarde, vert sauge, plomb, bleu nuit, brun acajou, cuivre, gris platine. Dita System may be
