Technical characteristics

A collection of all-foam cushion seating with no hard points. Its characteristic design will fit into both traditional and contemporary furnishing styles.

CONSTRUCTION Entirely composed of 3 different densities of foam (polyether foam 21 kg/m³ - 3.2 kPa & 28 kg/m³ - 4.8 kPa; high resilience polyurethane foam 26 kg/m³ - 1.4 kPa). **MAKING-UP** Its oversized covers are generously quilted with polyester. Although the covers can theoretically be removed by a professional, we strongly recommend that this model be the object of a 'dec/rec' (recovery) service at our factory to guarantee a perfect fit. **COMFORT** Elasticity of foams reinforced by buttoned threads. Soft but supportive comfort. The corner seat is particularly enveloping. **COVERING MATERIALS** Plain or printed fabrics are acceptable. Canvas and leather

Dimensions

Height 700 mm | Width 3,640 mm | Depth 1,620 mm |
Seat height 380 mm

are recommended. QUALITY Polyether foams of the highest quality. Generous use of polyester quilting.
