

LOW TABLE MALLEA

Designer

Guillaume Delvigne

Technical characteristics

If we are intrigued by the original shape of "Mallea" - created by the 4 legs of its square structure pressing against the circular shape of the top - we are just as taken with its edged granito top, whose connection with the base is particularly well-considered. Guillaume Delvigne's intent can be seen in the design, which expresses the notions of distortion and pliability through materials which are, for all that, rigid. Low table composed of a structure in satin-finish black lacquered steel (RAL 9005) with "Merrazzo" top or top in brilliant-polished LATTE (Brecha maritima) marble finished, CORSÉ (Marron emperador) marble finished or VERDE (Indian green) marble finished.

Dimensions

Height 380 mm | Diameter 1,000 mm
