

GEMSTONE

Designer

Brad Ascalon

Technical specifications

"Gemstone" embodies craftsmanship, a concept for which Ligne Roset is widely recognised all over the world. Like a precious stone meticulously shaped by hand by exceptional craftsmen, our "Gemstone" screen showcases its manual caning to perfection, a result that can only be obtained after years of experience. All wrapped in an abstract and organic frame, influenced by French Art Nouveau. "Gemstone" can be used, alone or with several elements, like a sculptural solution to divide the space and create some visual intimacy.
