

# SHELVING UNIT - H 170 3 MODULES BLACK LACQUER LA BIBLIOTHEQUE FIL

## Dimensions

Height 1,700 mm | Width 2,100 mm | Depth 330 mm |  
Weight 84 kg

## Designer

Pierre Paulin

## Description

MAX RECOMMENDED LOAD PER SHELF : 25 KG. BOOKSHELF H 170 cm MUST BE FIRMLY FIXED TO A WALL TO PREVENT IT TIPPING. A reissue of the shelving first designed by Pierre Paulin in 1972. Minimalist, it marries the black lacquer of its steel wire structure (Ø 10 mm) with the plywood used for its shelves (8 mm thick birch plywood, laminated in a matching colour with visible wood edges). It is constructed around modules W 70 cm which may be multiplied as desired. It is possible, for example, to create a 2 module shelving unit W 140 cm by juxtaposing two modules W 70 cm held together by 2 nylon linking-pieces each bearing Pierre Paulin's stamp. Each shelf has notches cut into it, into which the vertical uprights of the structure are inserted: this elegant method of assembly reinforces the stability

of the overall piece. The shelves rest on little steel wire hoops soldered onto the uprights. Each module W 70 cm sits on 4 adjustable jack feet. The 3 module shelving unit comprises 3 modules W 70 cm, held together by linking-pieces and shelves W 210 cm. Internal dimensions of each 'chest': H 38 W 33.3 D 33.
