

OXYDATION

Designer

Kateryna Sokolova

Technical characteristics

This collection of tables draws inspiration from contemporary architecture, sculpture, and research into the materials used, in particular, the natural properties of oxidization. It is thus a case of combining 'sustainable' materials such as stone or metal and making them into an architectural shape. The Oxydation tables combine a simple shape with a complicated texture and are a mix of traditional techniques and highly advanced technologies. As it oxidizes, metal can bring some unexpected results: each table is naturally unique, and one will certainly discover a myriad of variations in its oxidized top. Top and base in oxidized (acid-treated) steel, finished with transparent varnish.
