

COMPOSITION ET CETERA

Designer

Pagnon & Pelhaître

Technical characteristics

Similar to the Book & Look and Mixte systems, the Et cetera system offers endless variations all built to fall in line with the unit that precedes it. Et cetera is a system of bookcases, enhanced with the additional functions of traditional living room furniture: storage (doors, windows, shelves, and drawers), a TV unit and lighting. The name Et cetera refers to its dimensional possibilities: you can always increase the height or width of the unit with the likelihood of a perfect fit. The elegance of the Et cetera system comes from rigorous aesthetic choices, in regard to both its dimensions and its finishes. . Et Cetera is a vertically-constructed cabinetry system that consists of different combinations of side panels, shelves, back panels, and fronts. Et cetera is a system of bookcases, enhanced with the additional functions of traditional living room furniture: storage (doors, windows, shelves, and drawers), a TV unit and

lighting. The name Et cetera refers to its dimensional possibilities: you can always increase the height or width of the unit with the likelihood of a perfect fit. The highest standard side panel is 105 1/4" - 2676 mm. The elegance of the Et cetera system comes from rigorous aesthetic choices, in regard to both its dimensions and its finishes. - Compositions maintain simplicity due to the subtle use of a network of single 7" - 175 mm modules. - Lightness of the overall structure is a result of the 1 1/4" - 30 mm thickness of the side panels and shelves: the perfect compromise between necessary reassurance and desired aesthetics. - A uniform depth of 15" - 382 mm is made possible by the reduction of audio-visual equipment size. This allows the creation of a product that blends more easily into the required space because of its shallow and 'smooth' surface. - The finesse of the grooved hinged doors, as well as the flap doors, come from the almost negligible thickness (around 1/4" - 6 mm) that overlap the edges of the structure. Their elegant minimalist effect is accentuated by their handle-free, push-to-open mechanism. - The originality of the storage surface can primarily be attributed to the open niches offered in varying widths. They are both playful and functional at once and create an interesting grid-like appearance. This pattern creates a play on linear repetition. - The structure is available in white or

argile satin lacquer. The front panels can be either lacquered or enriched with sawn-effect oak veneer available in natural, anthracite or black. As a complement to the lacquer finishes (white, argile, lead), certain elements of this range are also available in the following 11 lacquer colors: beige, brick, chocolate, make-up, moutarde, sage, black, bleu nuit, mahogany brown, copper, platinum grey.
