

OTTOMAN MOBIDEC

Designer

Pierre Charpin

Technical characteristics

Ligne Roset is producing Mobidec, a footstool specially designed by Pierre Charpin for the 'MobiBoom' exhibition at the Musée des Arts Décoratifs (23.09.10 - 02.01.11), which was dedicated to the explosion of French design between 1945 and 1975. Quite evidently, the design of this footstool borrows from the equestrian world - which, is renowned as a guardian of artisanal tradition. . Resembling a slightly truncated pommel horse (or a saddle), the seat rests on a metal base which lifts it from the ground, the design of which is reminiscent of stirrups. A fabric strap, matching the footstool, encircles the seat, fixed to these 'stirrups', and serves as a handle to enable Mobidec to be lifted and moved with ease. CONSTRUCTION 3 layers of criss-cross panels clad in polyether foam 28 kg/m³ - 7.8 kPa. Base in steel wire (diameter 8 mm) finished in satin black lacquer with polythene gliders. COMFORT

Sizes

Width 14 " | Depth 15 " | Seat height 17 " | Seats 1 place |
Weight 26.455 lb
