

# FLOOR LAMP CINETIQUE

## Designer

Martin Hirth

## Sizes

Height 91 " | Width 67 " | Weight 52.911 lb

## Description

The design of the Cinétique light is as rigorous as the technical side, calling on an articulated counterbalance system which makes possible a multiplicity of positions and orientations of the light source. In fact, this is just as much a floor lamp as a reading light, providing both general indirect lighting (by angling the shade towards a wall or ceiling) and directional light above a settee, reading armchair or table. Epoxy satin black lacquered steel tubing Ø 0<sup>3</sup>/<sub>4</sub>"/20 mm. Round steel base Ø 15<sup>3</sup>/<sub>4</sub>"/40 cm. Black textile cable. Black foot-operated switch/dimmer. Equipped with a 20 W LED module emitting 2,100 Lumens or the equivalent of a 150 W incandescent bulb. Color temperature 3000 K (warm white). The above-indicated dimensions correspond to those of the floor lamp when totally unfolded. The dimensions when fully folded are 47"/120 cm x 15<sup>3</sup>/<sub>4</sub>"/40 cm x 63"/160 cm.
