Technical characteristics

STRUCTURE

Rectangular frame in high resistance tubular steel, finished in Epoxy black lacquer, with panels of particleboard clad in polyether foam (34kg/m^3 - 6.3 kPa). Steel-framed sleep area. Feet in molded aluminum Epoxy black lacquered.

COMFORT

Seat and back cushions (which become mattress) in high resilience Bultex foam of varying densities (core in 37kg/m^3 - 2.6 kPa, "comfort layer" in 32kg/m^3 - 2.1 kPa and top layer in 26kg/m^3 - 1.25 kPa). Lumbar/pillows in polyester quilting. Sleep area: $55'' \times 78'' \frac{3}{4}$, thickness $6'' \frac{1}{4}$.

MAKING UP

In version 1 the cover is quilted with 300g/m^2 polyester, buttoned and finished in mattress style, with toggles for removal by a professional. In version 2, the cover is quilted with 100g/m^2 polyester with points of stitching and piped detailing. In the case of both versions

the underside of the cover (turn over the mattress to sleep) which is in an exclusive 100% cotton piqué which has been treated with fungicide and antibacterial agents, may be unzipped and removed for dry cleaning. Lumbar cushion covers are held in place by buttons, and hold the pillows for the bed.
